EXPERIENCE

Senior Software Engineer | Agile Robots, Munich Jul 2025 – Present

- Led the development of a new full-stack e-commerce platform for AI robotics training data using Nuxt.js and Stripe
- Implemented ESLint and integrated it into the CI/CD pipeline, reducing bugs and ensuring consistent code quality

Senior Software Engineer | Pendo, Sheffield Aug 2024 – Jun 2025

- Served as interim Tech Lead during team transitions, ensuring seamless project execution and continuity.
- Redesigned the customer onboarding flow, integrating personalization features that increased install rate by 4% and reduced the time to first feature tagging by 37% (measured using Pendo analytics)
- Developed the homepage for the Pendo app, improving user experience and reducing time to value by 16% for all customers and 20% for enterprise clients (measured using Pendo analytics)

Software Engineer | Pendo, Sheffield Aug 2022 – Jul 2024

- Created the core interaction model for Pendo Roadmaps, serving as the foundation of the product
- Led multiple epics from planning to delivery, coordinating across teams to ensure feasibility and timely execution
- Mentored associate developers, ensuring they quickly became productive team members
- Delivered conference talks on various topics, such as Vue composables, engaging audiences and enhancing developer adoption within Pendo
- Recognised as the top recipient of Pendo's "Win Together" awards for collaboration and impact

Associate Software Engineer | Pendo, Sheffield Jun 2021 – Jul 2022

- Developed expertise in JavaScript, Vue.js, and testing frameworks (Jest, Cypress) through hands-on project work
- Assisted in organising an internal conference and enhanced office culture by founding a weekly climbing club

Embedded Software Engineering Intern | Q-Free, Bristol Jul 2019 – Sep 2019

- Designed a non-intrusive roadside detection system prototype for vehicle classification
- Developed software using C and Python to process LiDAR and radar data, generating real-time 2D vehicle profiles

Research Intern | Durham University, Department of Maths and Computer Science Jun 2018 – Feb 2019

- Developed a Python-based classification algorithm to generate unique graph configurations for mathematical research
- Research findings formed the basis of the main theorem in "Quartic Graphs that are Bakry-Émery Curvature Sharp", published in Discrete Mathematics, Volume 343, Issue 3, DOI: [10.1016/j.disc.2019.111767](https://doi.org/10.1016/j.disc.2019.111767)

PUBLICATIONS

Camera-Based System for the Automatic Detection of Vehicle Axle Count and Speed Using Convolutional Neural Networks
International Journal of Intelligent Transportation Systems Research, Volume 20, DOI: [10.1007/s13177-022-00325-1](https://doi.org/10.1007/s13177-022-00325-1) Sep 2022

- Peer-reviewed publication from Master's thesis implementing ML models in C and Python

SKILLS

Frontend: TypeScript, JavaScript, Vue.js, Nuxt, Tailwind CSS, SASS/LESS, HTML/CSS, ESLint

Backend: Python, Node.js, FastAPI, Fastify, SQLite, Prisma, REST, GraphQL

Testing: Vitest, Jest, Playwright, Cypress, pytest

DevOps & Tools: GitLab CI, CircleCI, Git, Linux, Neovim

Languages: English (Native), German (Native)

EDUCATION

Master of Engineering, Electronic Engineering, 2:1 | Durham University, UK

Jul 2020
